

JUKO HT

JUKO HT is a special luminaire designed to withstand even the most challenging conditions. The body of the lamp is die-cast marine aluminum, and its been designed to maximize the cooling of the light unit.

The luminaire can be installed in a variety of different locations and can be easily adjusted 180°, which makes it easier to focus the light.

A very efficient CREE COB LED element and a 40° reflector will certainly take the light to the target. With narrow optics and COB technology a minimal glare is achieved.

MECHANICAL PROPERTIES

Body	AlSi10 aluminum
Cover	Borosilicate glass
Optics	Silicone
Fasteners	A4
Cable glands	M25
Mounting	Wall / Ceiling / Pole
Mounting adapters	Optional
Adjustability	-90° ... +90°

ELECTRICAL PROPERTIES

Voltage	AC
Nominal voltage	100-240
Type of driver	Constant current
Power	25W - 100W

LIGHT UNIT

Type of LED	CREE COB
Color temperature	4000K
CRi	80-89
Light output (lm)	4820 - 18 424
Efficacy	~185 - 190 lm/W
Lifespan L80	100 000 h
Beam width	40°
